Response to Amendment

1. This action is responsive to Appeal Brief received on November 26, 2004.
2. In light of further explanation in "Detained Description of a Preferred Embodiment", the Examiner has withdrawn the rejection of claims 1-34.

Reasons for Allowance

3. Claims 1-34 are allowed over prior art of record.

The following is an examiner's statement of reasons for allowance:

Present invention is concerned with reducing overhead traffic in providing routing information for forwarding packets with a distributed router.

The closest prior art, Civanlar et al. (US 6,078,963) and Dobbins (US 5,509,123) disclose route computation engines obtaining registration information from the internal forwarding tables. However, the cited art, alone or in combination, fails to obviate the unique method steps of "obtaining registration information from a plurality of forwarding engines at a route computation engine, identifying the plurality of forwarding engines based on the registration information and generating at least one specific forwarding table for corresponding forwarding engine" as claimed in independent claims 1, 8, 15, 19, 24, and 31, therefore rendering claims 1-34 allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
